## Declaration of Conformity – REACH RoHSDear Sir or Madam,

In the EPSa GmbH, all necessary logistical and technical requirements for the clear handling of components and auxiliary materials in the product realization process are defined to ensure that the current order documentation of the customer (drawing documentation) is fully implemented in every case.

The owner of the parts list is responsible for the components and auxiliary materials used in any case. Any deviation in our production process must be confirmed by the customer (owner of the parts list).

EPSa GmbH confirms that it will only use the components and auxiliary materials specified in the relevant customer documents and will comply with and implement the existing contracts. This ensures that the assemblies are manufactured in accordance with the customer documents according to the requirements of Directive 2015/863/EU (amendment of Directive 2011/65/EU), while also considering and adhering to Regulation (EC) 1907/2006 (REACH).

The auxiliary materials used by EPSa GmbH for the production of the assemblies unconditionally meet the aforementioned requirements.

We hope that this information has been helpful to you and we are of course available for any further questions.

Mit freundlichen Grüßen

Roland Krauß

Head of Quality Management Sustainability Management
