

Automated placement machine operator in a 3-shift system (m/f/d/a)

Your responsibilities:

- Preparing the assembly line for production
 - e.g., setting up the placement machines
 - Setting up the printer
 - Setting up the conveyor system
 - Loading the oven program
- Monitoring the assembly line during production
 - e.g., retrofitting components
 - Visual inspection of the assemblies
 - Manual placement of individual components
 - Monitoring of the assembly line (printer, placement machines, oven)
- Follow-up work on the assembly line
 - e.g., unloading the placement machines
 - Cleaning the printer
 - Cleaning of the placement machines
- AOI/AXI inspection of assembled circuit boards

We offer:

- Job security, free work uniforms, and competitive compensation, including profit-sharing
- 30 days of annual leave (up to 33 days depending on length of service)
- Practical, personalized onboarding
38-hour workweek and paid leave for specific life events
- Break areas with kitchen facilities, snack and beverage vending machines
- A friendly and open corporate culture with regular summer parties and the annual Christmas party
- Company pension plan, internal health programs, the option to lease a bike through JobRad, and a contribution toward the Deutschlandticket

Your profile:

- You have completed vocational training in electronics or another technical field, or possess other technical skills and expertise. This position is also open to career changers.
- Ability to work carefully and independently
- Reliability and the ability to work well in a team
